This is going to be a little bit different type of a presentation because the first part of it is going to be from a TV and you know you can't just show a TV on zoom or on your computer. I had to actually set up a camera and video the screen of the two TV's that I have to show you. It's going to be about a 10 minute video.

Before we start, remember that you don't have to buy a Roku box or a Roku stick, or a fire stick, or a firebox if you have a smart TV

You don't need to shut off your cable in order to try streaming. You can stream in addition to using the cable service while you try it. You can get used to using streaming. Then if you decide the extra work is worth saving the money and you can get what you want and you don't have to pay for a lot of things you don't want.

You can also get a lot of free things as well. So let me get started with the video. Then we'll go into some of the services that can get Free TV and Free Movies. Then I'll answer any questions.
